## Eye Chart - Word Making

Name: $\qquad$
How many words can you make only using the letters in the chart below? If the letter only appears once, you can only use it once within a word. For example, you could make the word 'are' but not the word 'area', because the letter ' $A$ ' only appears once in the eye chart.
Can you make the 11-letter word relating to eye health?

# F R <br> TAE <br> U P T I <br> M S B O D <br>  <br> D G K L W N Y Z J
